The Honorable Sam Graves
Chairman
Committee on Transportation and Infrastructure
US House of Representatives
2165 Rayburn House Office Building
Washington, DC 20515

The Honorable Rick Larsen
Ranking Member
Committee on Transportation and Infrastructure
US House of Representatives
2164 Rayburn House Office Building
Washington, DC 20515

Dear Chairman Graves and Ranking Member Larsen,

The undersigned write to express their strong support for HR 1500, the ITS Integration Act. This bipartisan legislation, introduced by Representatives Garret Graves and Salud Carbajal, takes important steps towards ensuring we use digital tools, such as data, to operate more efficiently, effectively, and safely on American roads. We urge you to move this legislation through the Committee.

In directing the United States Department of Transportation to leverage protected, secured, and anonymized third-party transportation data to inform transportation planning and real-time traffic management, the ITS Integration Act reinforces and expands upon the crucial role data and technology play in ensuring a safe and efficient transportation system. The implementation of this bill will help save lives, manage congestion, and improve freight and supply chain efficiencies, all while increasing American competitiveness on the global stage.

It is critical that we strategically invest in our country's digital infrastructure, and this bill does precisely that. Our nation's transportation network is poised to derive significant benefit from the utilization of transportation data that this bill allows, and we encourage the House Transportation and Infrastructure Committee to move quickly to advance this legislation.

Sincerely,

ITS America
