ITS America Committees, Working Groups, and Communities of Practice

ITS America Standing Advisory Committees are member-driven forums where representatives can help shape policies and programs key to their organizations' national goals.

Committees	Working Groups	2024 Focus Areas
Digital Infrastructure	• AI and Digital Transformation • IIJA and DI Policy	• Design a DI Vision and Framework along with deployment resources • Create AI policy principles • Develop DI and technology funding reauthorization policy
V2X & Connected Transportation	• Future of 5.9 V2X • Beyond 5.9 V2X	• Inform USDOT's interoperable connectivity deployment plan • Develop practical resources for deploying V2X at scale • Create a Beyond 5.9 V2X deployment plan
Automated Vehicles	• AV Freight	• Create a public and private sector framework for successful and safe AV deployment • Address infrastructure opportunities to support AV freight commercialization
Emerging Technologies	• Multimodal Transportation & On Demand Mobility • Digital Twinning • Advanced Air Mobility	• Examine the integration of emerging technology into multimodal networks • Educate through digital twinning use cases • Create AAM integration resources

To sign up for a committee, working group, or community of practice, please contact Eryn Banton ebanton@itsa.org or Tina Williams twilliams@itsa.org.

ITS America Committees, Working Groups, and Communities of Practice

The ITS America Communities of Practices will focus on **educating, supporting**, **and cultivating** group learning on topical areas, **encouraging** the work of members through discussions and sharing, and **integrating** by helping members use their new knowledge for real change in their respective work.

Communities of Practice	2024 Focus Areas
Equity	• Identify strategies to increase the number of people of diverse backgrounds in the transportation workforce and advance gender equity in the transportation ecosystem • Identify strategies, policies, and technologies to enhance transportation equity
Sustainability	• Evaluate industry needs and technologies related to sustainable and resilient transportation • Advise on industry priorities regarding the Joint Office Electric Vehicle Working Group
Cybersecurity	• Develop a resource that explains cybersecurity in transportation • Provide guidelines for procuring cybersecure technology
Workforce Development	• Explore strategies to assess the current workforce and identify opportunities to upskill and train to meet the future needs of the industry • Foster learning and development opportunities through knowledge sharing and collaboration

ITS America Communities of Practice ensure that the ITS industry's core values are continuously promoted. Our 2024 Communities of Practice include Equity, Sustainability, Workforce Development, and Cybersecurity.
