

## *Abbas Mohaddes bio. Feb. 2024*

*Abbas Mohaddes is a founding, current board member and former Chairman of ITS America Board of Directors. He has served on various committees at ITSA including Finance, Strategic, and Nominating. He is a member of the Transportation Research Board (TRB) and a former member of its Executive Committee. Mr. Mohaddes is a member and former Chair of the Board of Trustees for the Mineta Transportation Institute (MTI). He is an Institute of Transportation Engineers (ITE) Fellow, as well as a member of the University of California Irvine, Chancellor's CEO Roundtable. He is also serving as a member of the Board of Directors for ITS World Congress.*

*Abbas is an entrepreneur, after serving the City of Dallas, Texas as a Traffic Engineer, and several years of consulting practice, co-founded Meyer, Mohaddes Associates in 1991. This Los Angeles-based firm focused on the application of technology in traffic management and systems planning, which later merged with Iteris, where he was CEO for eight years and helped take the company public (AMEX:ITI, now NASDAQ:ITI) and led the transformation and growth of the company into a software-based traffic management information technology organization.*

*In 2016 he joined Econolite Group as President and COO, and later served the company as its CEO where he helped transform the organization into a premier and robust technology organization focused on traffic management products and services. On December 2022, Mr. Mohaddes was appointed Chairman of the Board of Umovity and PTV Logistics. Umovity includes Econolite and PTV Mobility focused on traffic management software and Hardware products and services globally. PTV Logistics serves the Commercial vehicle transportation industry in route optimization and efficiency of goods movement currently focused on Europe, US, and Middle East.*

*Mr. Mohaddes has been advocating the application of technology in transportation to improve the safety and mobility of the travelling public during his 40 years in the industry. His volunteering and philanthropic activities are focused on supporting and empowering young and underserved students through education. His technical area of interest includes traffic management, communication, traveler information, systems integration, transit, and Connected and Automated Vehicles (CAV). He is a recognized expert in ITS and has over 70 publications and presentations at industry organizations around the world. Mr. Mohaddes holds a master's degree in Transportation Engineering from the University of Nebraska Lincoln. He also completed the Advanced Technical Management Program at the University of California, Los Angeles (UCLA), Anderson School of Management.*
