

DEPLOYING TODAY, EMPOWERING TOMORROW

August 24-28, 2025 | Georgia World Congress Center

Company Name: Blyncsy A Bentley Systems Company

Project Title: Michigan DOT uses Blyncsy to Meeting Federal MIRE and HPMS Requirements

Bentley Systems and Blyncsy are proud to announce that Michigan Department of Transportation has entered into a multi-year contract to use Blyncsy's vast network of dash camera imagery to collect roadway characteristics to meet federal requirements of Model Inventory of Roadway Elements Fundamental Data Elements (MIRE FDE) and Highway Performance Monitoring Systems (HPMS). Blyncsy will be documenting over 17,000 miles of road throughout the state. In addition, Blyncsy will be collecting imagery from up to 14,000 intersections for this project.

To explore the data Michigan will be collecting and reporting, including the Model Inventory of Roadway Elements (MIRE) data, roadway characteristic and traffic inventory elements critical to safety management, you can browse their dashboard here: <https://lnkd.in/g4Rkvs6v>
